1 Find out how many prime numbers are there between 1 and 500

```
#include <stdio.h>

int main() {
    int i, j, flag, count = 0;

    for (i = 2; i <= 500; i++) {
        flag = 1;
        for (j = 2; j <= i / 2; j++) {
            if (i % j == 0) {
                flag = 0;
                break;
            }
        }
        if (flag)
            count++;
    }
    printf("Total prime numbers (1{500) = %d\n", count);
    return 0;
}
```
